CSPO Planning

Change to CSPO System?	
Change Planned?	Where/When Planned?
Assign to System:	Assign to Release/Delivery: A2.3 and all future releases (M1, M2, M3, A3)

Requirements Description

Business Area:	
Request Type:	Business Need
Impacts Trade?	Yes
Description of Change:	<i>Software development for data transfers between parties has evolved over the recent years using new formats such as XML. Many companies have experience with XML data transfers and would like to use this format to exchange data with CBP. XML will be incorporated into ACE. Customs has historically developed proprietary standards for EDI, and under ACE should ensure that XML utilization for Trade interfaces complies with appropriate international standards. CBP will continue to support multiple EDI standards. ACE will permit transmission by the following EDI standards: ANSI-X 12 UN/EDIFACT CATAIR CAMIR AESTIR Cargo IMP (CBP Implementation will be more closely aligned with IATA standards). As new data standards are developed in the software industry, CBP should evaluate the standards to see if they should also be offered as an alternative standard for data transfers.</i>
Benefit of Change:	<i>Providing multiple data formats allows the filers to take advantage of the expertise and resources available to them in their own organizations.</i>
Impact Assessment:	Unknown at time of entry in tool.

System/Subsystem

System:	ACE	Cargo Business Area:
